

Enjoying 24-Hours Milk SPA

Milk protein fiber realizes our dream. Milk is benefit to our skin. For a long time, a large number of nobles are keen on beauty their skin in milk bath. Today, the concept of "Wearing milk" has come true. After more that 10 years research, it has finished the development of milk protein fiber as well as the complete process of industrial manufacture to create a new field in fiber world.

Most Comfortable: excellent water transportation and air-permeability

More Healthy: The rate of bacteria-fighting reach 80% and get Oeko-Tex Standard100

As the 3-generation fiber, following natural fiber (1-G fiber) and synthetic fiber (2-G fiber), milk protein fiber combines predecessors' advantages with natural anti-bacteria and healthcare functions.

In addition, it has been certified by the Oeko-Tex Standard 100.

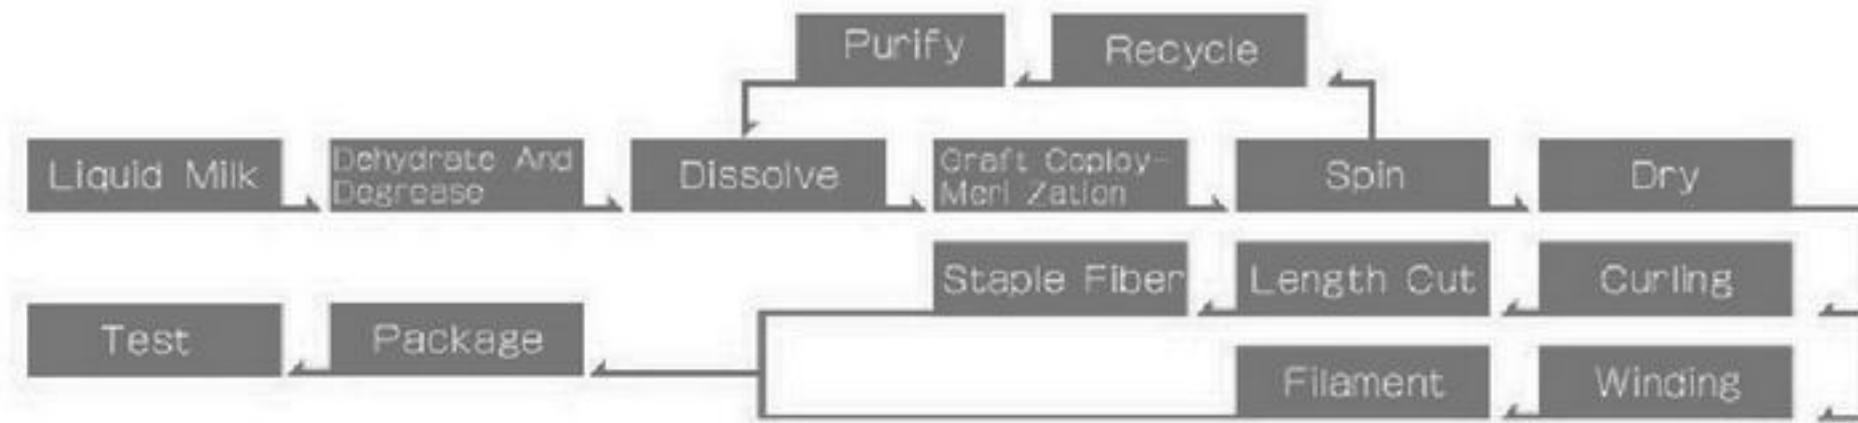

Colorful: Keeping tender hand-touch and bright color after several washings

Easy Care: Being resistant to fungus, insects and aging

Production process of milk protein fiber

—Milk fiber is the graft copolymer of casein and AN.

(The technology with Eco-friendly, clean production)

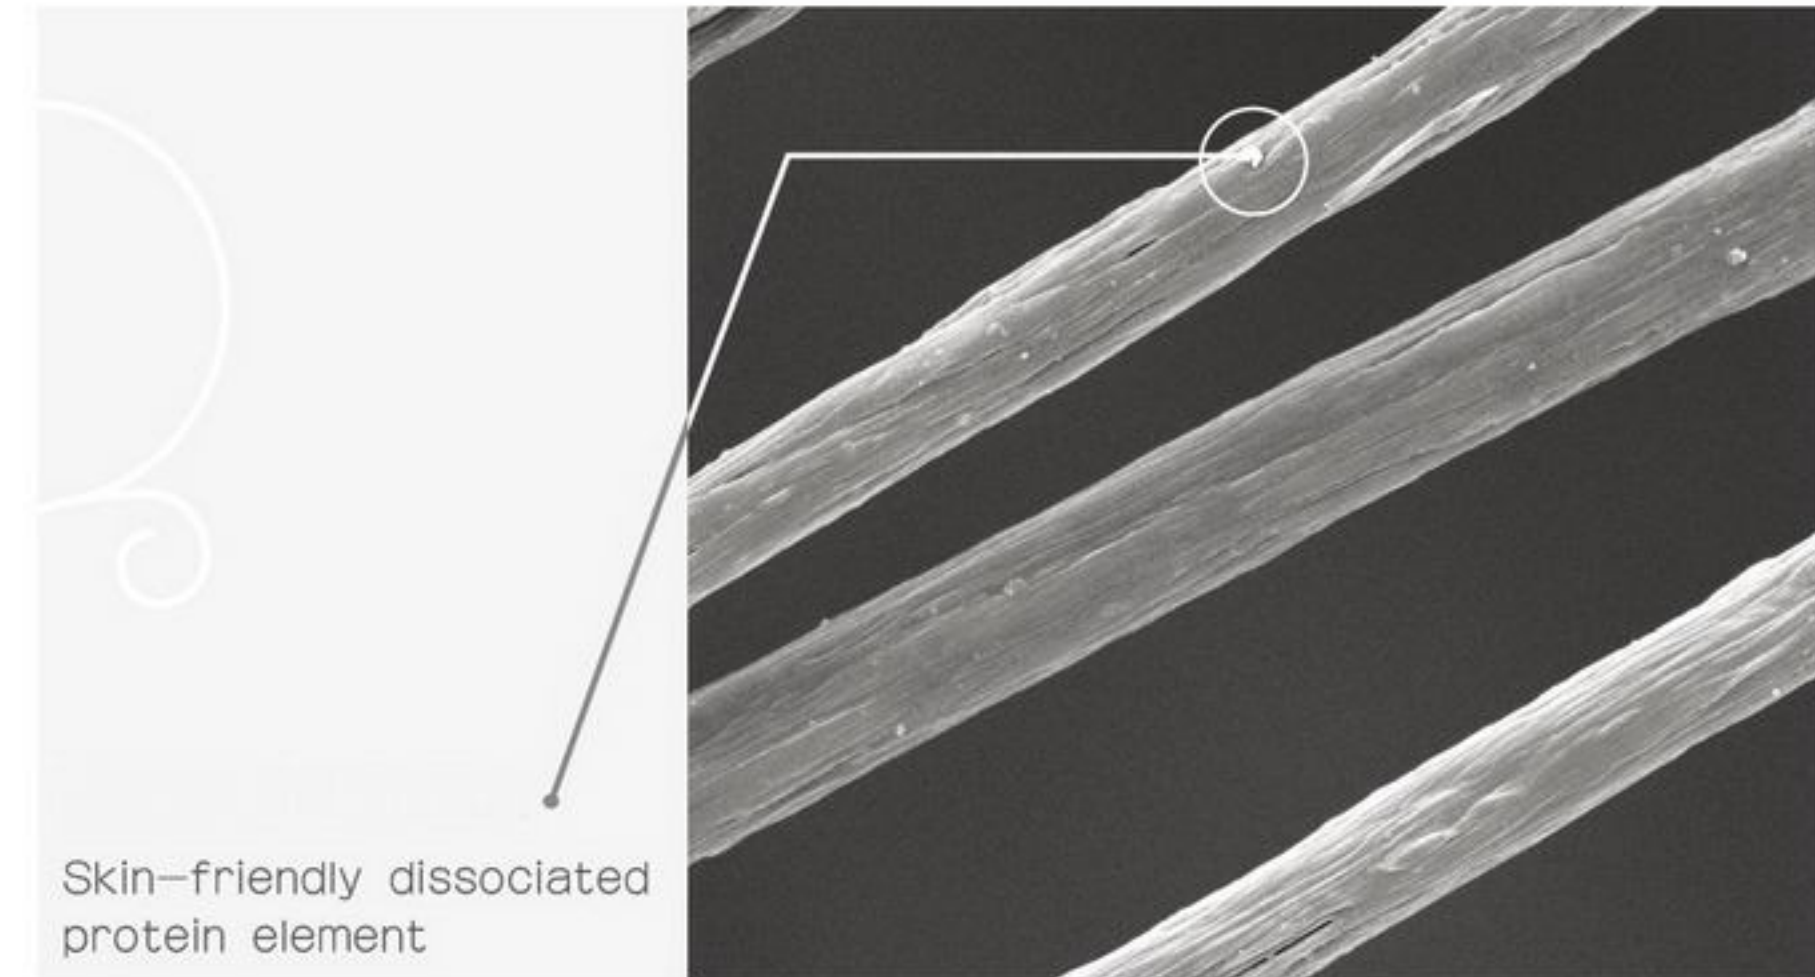

Product style

1. Filament

- 75D
- 100D
- 150D

2. Staple fiber (selective length)

- 1.5D × 38mm
- 2.5D × 88mm
- 6D

Skin-friendly dissociated protein element
